Tanzania, Africa. Intense Purple w blue overtones. Excellent clarity. Mounts in a 7 x 9 standard mounting, actual measurements 6.25 x 8.48 x 3.77 mm. 1.65 ct.

Tanzanite is a very beautiful and unique colored gem. When mined, it is usually trichroic which means it has three colors – blue, purple and orange. Orange is seen as undesirable as a faceted gem. So it is heat treated which changes the stone to dichroic or two colors, just blue and purple. This is a permanent treatment and does not reverse. Tanzanite has a brittle tenacity and demands TLC. Discovered in the 1967 in the Mirerani hills near Arusha and Mount Kilimanjaro, Tanzania, Africa.

Paypal and certified check payments ship immediately. Personal checks must clear before we ship. If you are not completely satisfied after receiving your shipment, return it within 7 days after receipt for a full refund, excluding shipping.

Note: Items must be returned in the same condition as received.
