## “Texas Lone Star Reflection Cut” Blue Topaz

This was a custom cut gem, now in a private collection.. Flawless and measuring approx 11 mm and weighing in at approx 7.50 ct., it was priced at \$480. I design each star a little different, so every piece is one-of-a-kind. I have many designs and rough available rough for custom cutting your star!

This cut is doubly reflected. The second star shows between the legs of the first one you see. The long kite shapes in the legs of the star wink on and off as the gem is rotated! Be aware! This beauty will pull you into the blue light!

## Imperial Topaz concave cut.

Just finished cutting this beauty. Quite a rare color. **A GIA certified gem.** Depending on source there are mixed opinions on color. Some say it needs to be viewed in incandescent light – like the photo on left. Others say sunlight or 5000K light like the one on the right which is taken in sunlight is a red orange. Either way, this gem is awesome. Weighing 2.16 ct and measuring 8.25 x 6.96 x 5.11 mm, it is concave cut and eye clean!

Provenance: I purchased the rough in a parcel back in 1985. Photo of the original crystal and Stinson's COA also included. **I have a few more imperial topaz xyls to cut. Please inquire.** Regular Price \$4500 **ON SALE SOLD**

## **"The jump to Light Speed"**
